

ENGR. MUHAMMAD HUSNAIN SHAH

Civil Engineer | PEC: CIVIL/68032

mhusnainshah055@gmail.com • +92 315 6079867 • Chiniot

PROFESSIONAL SUMMARY

Civil Engineer with 4+ years of progressive experience delivering both infrastructure and building-construction projects, including hospitals, residential blocks, roads, Overhead Reservoirs (OHR), water-supply networks, sewerage systems, and wastewater treatment plants. Skilled in planning, execution, and quality assurance, with demonstrated strengths in geotechnical investigation, foundation design, and laboratory supervision.

CORE COMPETENCIES

- | | | |
|------------------------|------------------------------|------------------------|
| • AutoCAD & Plan Swift | • Geotechnical Investigation | • Foundation Design |
| • Primavera (Beginner) | • Soil Improvement | • Quantity Take-off |
| • MS Office Suite | • Site Supervision | • Quality & Compliance |

PROFESSIONAL EXPERIENCE

Site Inspector | TUMMAS Turkish Engineering Consulting Jan 2026 – Present | Multan

- Contributing to the *Misali Gaon* (Model Villages) initiative, supervising village-level civil-infrastructure works across multiple sites.
- Overseeing construction and commissioning of rural sewerage systems, including CSP networks and Anaerobic Baffled Reactor (ABR) treatment units.
- Inspecting water-supply distribution lines, erection of Overhead Reservoirs (OHR), and pavement works for material quality and design conformance.
- Maintaining daily inspection logs, material test records, and progress reports for consultant and client review.

Assistant Resident Engineer | Master Consulting Engineers (Pvt.) Ltd. Jun 2025 – Jan 2026 | Kot Addu

- Acted as ARE on the construction of a 50-bedded Mother & Child Care Hospital, including Grade 16–19 staff residences, cafeteria, and laundry block.
- Led quality-assurance checks on materials and workmanship; resolved technical issues in close coordination with the design team.
- Conducted field inspections to verify compliance with drawings, specifications, and contract standards.
- Reviewed shop drawings, material submittals, and method statements prior to execution, ensuring alignment with approved design intent.

Lab Engineer | NFC Institute of Engineering and Technology, Multan April 2024 – Oct 2024 | Multan

- Supervised all Civil Engineering laboratories, including soil mechanics, concrete technology, transportation, and structural-testing labs, in accordance with ASTM/AASHTO protocols.
- Conducted and oversaw standard tests including CBR, Proctor compaction, sieve analysis, Atterberg limits, slump, and cube/cylinder compressive-strength testing.
- Trained and mentored undergraduate students on equipment operation, sampling procedures, and reporting standards; maintained calibration logs and validated test-result accuracy.

Site Engineer | M/S Yaha Husnain Builders Jan 2021 – Dec 2023 | Multan

- Executed road construction, Overhead Reservoirs (OHR), water-supply distribution networks, sewerage lines, and wastewater treatment plant projects from layout through commissioning.
- Supervised earthworks, sub-grade preparation, RCC works, pavement laying, and pipeline installation; enforced safety protocols and adherence to project specifications.
- Prepared BOQs and material take-offs using Plan Swift, issued daily/monthly progress reports, and coordinated with contractors, consultants, and clients to keep works aligned with drawings, schedule, and budget.

EDUCATION

M.Sc. in Geotechnical Engineering 2022 – Present

University of Engineering and Technology (UET), Lahore

B.Sc. in Civil Engineering 2017 – 2021

Bahauddin Zakariya University, Multan
